Abstract

Sustainable development of rural areas helps achieve that change which is inevitable, and do so in an economic way, responsible for the environment, and fair in terms of social. Ecotourism provides the necessary resources and tools to help rural communities to continue their own path of sustainable development. Valorising the diversity of the mountain landscape, the traditional and cultural heritage must become a priority of the rural development policies, and the development of the entrepreneurial culture and attracting structural funds of investment the main instruments – basic pillars to support these policies and strategies.

Keywords: ecotourism, sustainable development, biodiversity, rural mountain area.
